

Optical Micro Tips-Near Field Microscopy-Fiber SMF28-AI-100nm

OMT-NFM-SMF28-AI-100

AFM Nanoprobes provides three standard fiber optic options that are designed for Near-Field Scanning Optical Microscopy (NSOM/SNOM) and will cover most applications. Optical Micro Tips for Near Field Microscopy (SNOM) applications:

SPECIFICATIONS

short_desc	Optical Micro Tips for Near Field Microscopy (Pack of 10). Fiber: SMF28 Typical fiber length: 1m Coating: Al Aperture Size: 100nm Contact us for other lengths, aperture size, or fibers.
Categories	AFM Probes, Optical Micro Tips
Tags	: General Topography, Optical Properties, Scanning Near-field Optical Microscopy (SNOM), Spectroscopy
Quantity	10
